Description

Dromex® high visibility reflective caps, and full brim hats with reflective tape, are suitable for users in situations or work environments that require high visibility.

The reflective cap and sun hat are both designed with, mesh panels in the crown area for maximum cooling and ventilation and reflective binding around edge of headwear for added visibility and 360 degrees reflective coverage.

Features of the reflective cap:

- 6 panel cap
- Pre-curved peak
- Adjustable velcro closure
- Available in yellow or orange high visibility colours
- Available with a reflective neck curtain
- 13mm reflective trim

Features of a Reflective Hat:

- Adjustable drawstring chinstrap
- Chinstrap secures hat onto face and head
- Available in yellow or orange high visibility colours
- 20 mm reflective trim

Special Instructions

None of the materials or processes used in the manufacture of these products are known to be harmful to the wearer.

The information contained herein is intended to assist the wearer in the selection of personal protective equipment.

Actual conditions of use cannot be directly simulated in a test environment therefore it is the responsibility of the end user and not the manufacturer or supplier to determine the industrial reflective hat or cap, suitability for the intended use.

Specifications

Style: High visibility cap or full brim sunhat with reflective tape and Dromex® sidewinder

Material: 100 % polyester non-woven

Reflective tape: Retro reflective glass beaded

Compliancy & Conformity

Reflective tape: ISO 20471:2013 specifies requirements for high visibility clothing which is capable of visually signalling the user's presence. The high visibility clothing is intended to provide conspicuity of the wearer in any light condition when viewed by operators of vehicles or other mechanized equipment during daylight conditions and under illumination of headlights in the dark.

- JT503-Y LIME reflective bush hat with orange-silver tape
- JT503-OR ORANGE reflective bush hat with yellow-silver tape

Sizes Available

1 size fits all, full range.

Cleaning & Maintenance

Dirt accumulation on reflective attire diminishes the intensity of fluorescent colour, therefore regular cleaning is recommended. Sun hats and caps can be spot cleaned by wiping dry with a soft clean cloth.

Machine wash with like colours in cold water on a delicate cycle using a mild detergent, to prevent damage of retro reflective tape. Do not bleach.

Do not use fabric softener.

Do not iron.

Do not dry clean.

Tumble dry on low heat. Remove immediately.

Never use harsh chemicals or solvents to clean your reflective sunhat or cap.

Disposal

All industrial waste should be disposed of correctly according to local regulations and good disposal practice. Reflective garments should be disposed of considering the hazardous substances they were used for. Please consider recycling.
